

Company Highlight

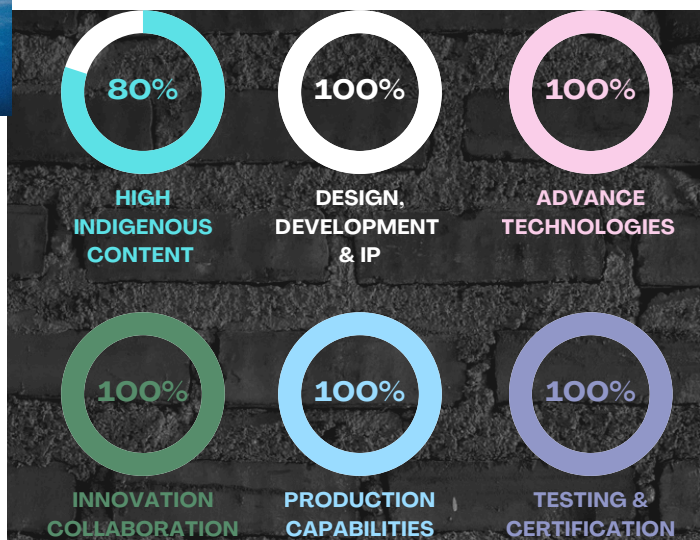

EON Space Labs is a pioneering imaging technology company specializing in the design and manufacturing of advanced Electro-Optical and Infrared (EO/IR) payloads for satellites, drones, and ground-based platforms. Driven by precision engineering and a commitment to custom-built solutions, our systems are tailored for mission-critical applications in:

- Tactical Surveillance & Border Security
- Precision Agriculture & Environmental Monitoring
- Disaster Response & Resource Management

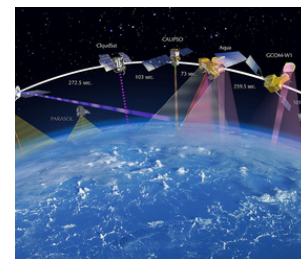

Our strength lies in a founding team with deep expertise across optics, AI, aerospace systems, and hardware design, delivering innovation at every stage.

From sky to ground, EON's imaging payloads are built to capture clarity when it matters most.

Our Expertise

Industry We Serve

Space & Earth Observation

- Satellite imaging payloads
- High-res optics for small satellites
- Natural resource & environmental mapping
- Urban planning & infrastructure analysis

Defence & Homeland Security

- Border surveillance & tactical reconnaissance
- Anti-drone detection & tracking
- Airborne & ground ISR operations
- Thermal targeting & night vision systems

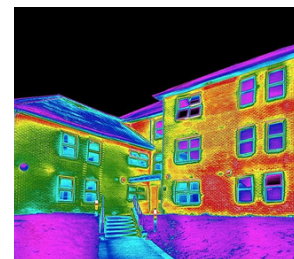

Precision Agriculture

- Crop health & multispectral monitoring
- Irrigation & water stress analysis
- Pest detection & yield forecasting
- Drone-based farm analytics

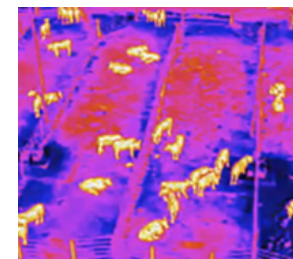

Disaster Management & Emergency Response

- Thermal search & rescue operations
- Real-time situational awareness via drones
- Aerial assessments post disaster
- Ground-level movement surveillance

Critical Infrastructure Monitoring

- Thermal surveillance of critical assets (oil, gas, nuclear)
- Railways, ports & grid monitoring
- Automated perimeter security
- Long-range threat detection

Wildlife & Forest Monitoring

- EO/IR-based poaching detection
- Forest fire thermal monitoring
- Wildlife tracking & behavior studies
- Protected area surveillance

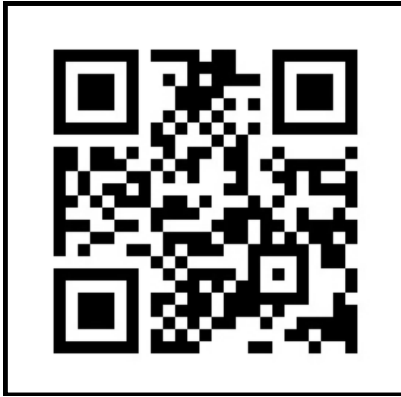

Major Products

Buho-with PAN-TILT

Buho-with PAN-TILT

EO OPTIZOOM

NAGA THERMAL SIGHT

LUMIRA on DRONE

LUMIRA MULTISIGHT

LUMIRA with Gimbal

ASTRA VIEW

ARGUS FOR SPACE

MIRA FOR SPACE

Advanced Imaging Payloads

for Aerial & Ground
Applications

Customised Lightweight Payloads
